Conservatories | Orangeries | Extensions

CONSERVATORIES | ORANGERIES | EXTENSIONS

You might not know it, but your home has potential – not just to be bigger or brighter or higher in value, but to give you a better standard of living.

Maybe you feel you've outgrown your existing property, and are yearning for something more spacious and stylish – something more 'you'. Maybe moving feels like the only option. But it isn't.

With the right products, meticulous planning and expert execution, you'd be amazed at how much a conservatory, an orangery or an extension project can transform your home – and how much it can save you compared to a house move.

Moving costs tens of thousands of pounds. On top of the price of the property itself, there's stamp duty and estate agent fees to consider – and the average homeowner then goes on to spend £10,000 renovating their new home in the first year of owning it.

In other words, you can spend a small fortune moving house, or for a fraction of the cost, you can transform your existing home.

It's easy to flood your home with natural light, bring the outside in, and create a vibrant, stylish living space you can enjoy all year round. At SEH BAC and FineLine, our expert team of designers and installers have been helping homeowners make their home improvement visions a reality for 50 years. Let us help you realise yours.

Why choose us?

Honest advice, expert installations, and a stunning range of windows, doors and conservatories perfectly tailored to you and your home – that's what you get when you work with SEH BAC and

FineLine, one of the region's longest-serving home improvement companies.

For 50 years, as part of One Group Construction, we've dedicated ourselves to providing quality products and exceptional customer service, successfully completing thousands of projects across the South East of England.

We've got the passion, the knowledge and the experience to help you build your dream home. Call us today to find out more, or visit our website to find a show-centre near you.

We look forward to working with you

Peter Wheeler, MD

FIVE DECADES OF HOME IMPROVEMENTS

We understand that entrusting your home to someone for your next home improvement is a big decision.

As the leading home improvement company serving the South East including Suffolk, Essex and Kent, and with 50 years' experience, you can have peace of mind that you will receive the highest quality products and installation available on the market.

We are accredited by the relevant industry bodies and associations, meaning you can be sure that all our products meet strict security, energy efficiency and quality standards.

Trust is something we have earned, and out of more than 900 reviews on Trustpilot we have gained an 'Excellent' rating and 4.5 stars out of five from our satisfied customers. And with 11 stunning, state-of-the-art showrooms across the South East, our knowledgeable team are on hand with expert advice wherever you are.

We are also part of the Ipswich-based One Group Construction, a £160m group of specialist construction companies which complete major infrastructure and construction projects across the UK.

All the above are just some of the reasons why we have received many of the biggest awards in our industry over the years, including Installer of the Year.

So why not have a look at what we do – and be inspired.

POWERED BY

BUY WITH CONFIDENCE

When you enlist SEHBAC to carry out your home improvements you're not just buying quality products, you're subscribing to quality service too.

From start to finish we'll put you and your property first. Everyone you have contact with, from designers and consultants to surveyors, builders, and installers, will strive to ensure that the installation process proceeds as quickly and smoothly as possible. And all work comes with a comprehensive 10-year guarantee.

And at SEHBAC, not only do we want you to get the home improvements you desire, we want to help you get them for a price you can afford.

That's why we work with Novuna to offer our fantastic finance packages that allow you to improve your home on a payment plan that suits you.

FROM DESIGN TO INSTALLATION, WE'RE WITH YOU ALL THE WAY

When you first contact us, our expert designers will take time to get to know you, your property and what you want to achieve. They'll guide you through available options, and advise you on every aspect of your installation.

When you're ready to proceed, one of our experienced technical surveyors will be in touch to arrange a convenient time to visit. They'll inspect your property, and take precise measurements. This is the perfect chance to ask any last minute questions you have.

From there, the survey details are then sent through to our state-of-the-art manufacturing facility. None of the products we install are off the shelf. Each one is bespoke, made for you, to your requirements, and our surveyors' exact specifications, using cutting-edge computer-aided design software.

No need to fear - we will make sure we follow the current best building practice and where required, building and planning regulations.

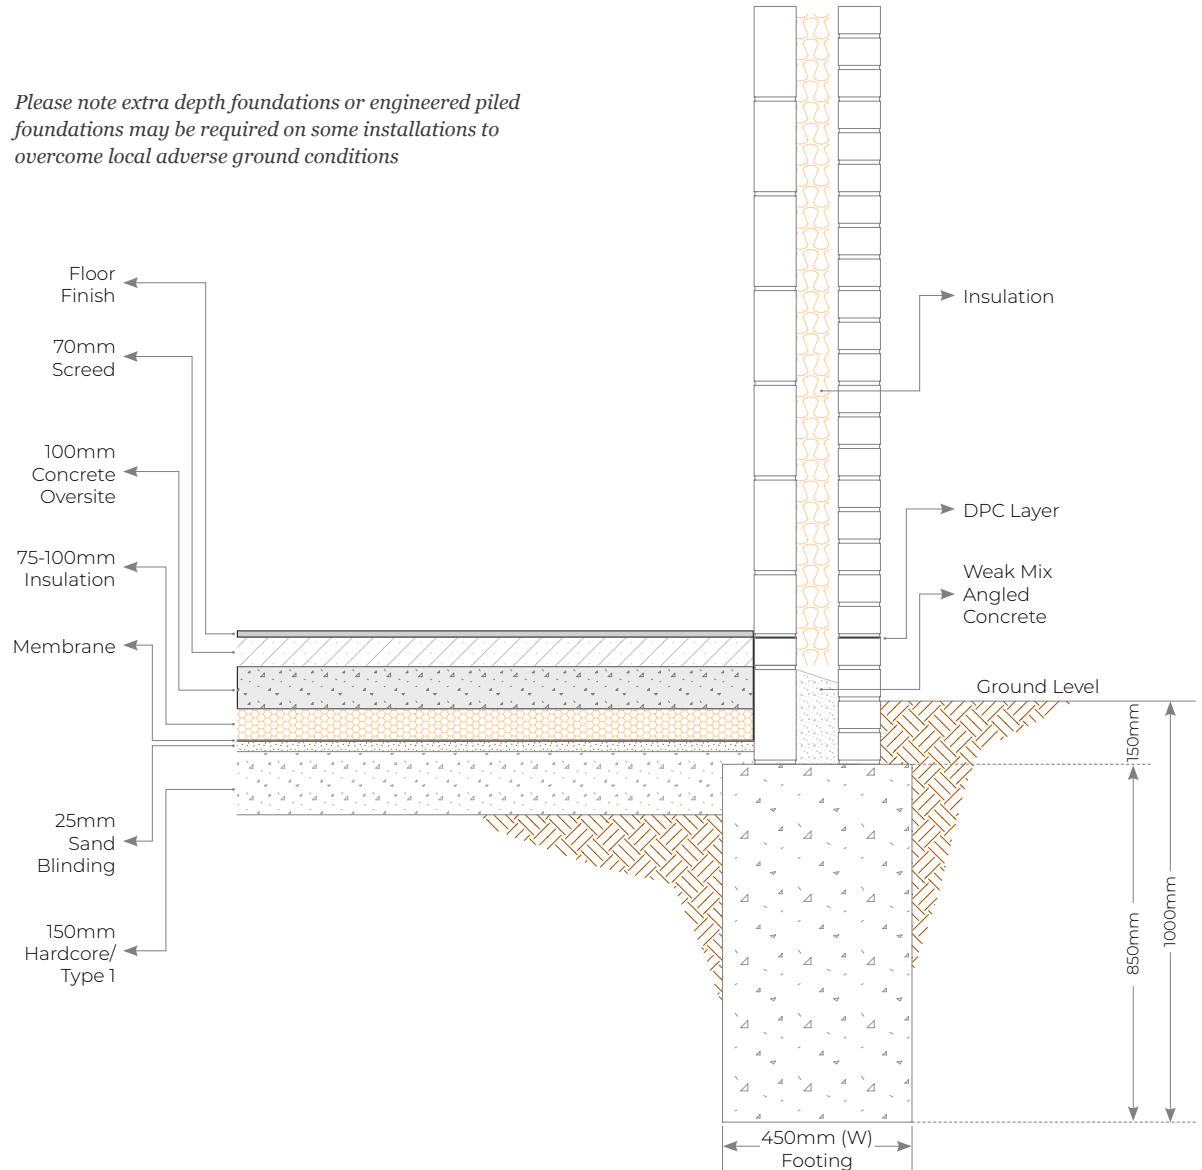

Once your products have been manufactured, we'll be in touch again to arrange the installation. Friendly, experienced installers will arrive in an SEH BAC installation van, introduce themselves, then get to work.

When the project is finished, our installers will make sure you're completely happy, then leave you to enjoy your stunning new conservatory, orangery or glazed extension.

Every installation SEH BAC undertakes is overseen by a dedicated and experienced project manager. They will ensure every aspect of the project is completed correctly and to schedule, from initial enquiry, right through to inspections, design and installation. They will serve as your constant point of contact throughout the renovation to answer any queries or questions you may have.

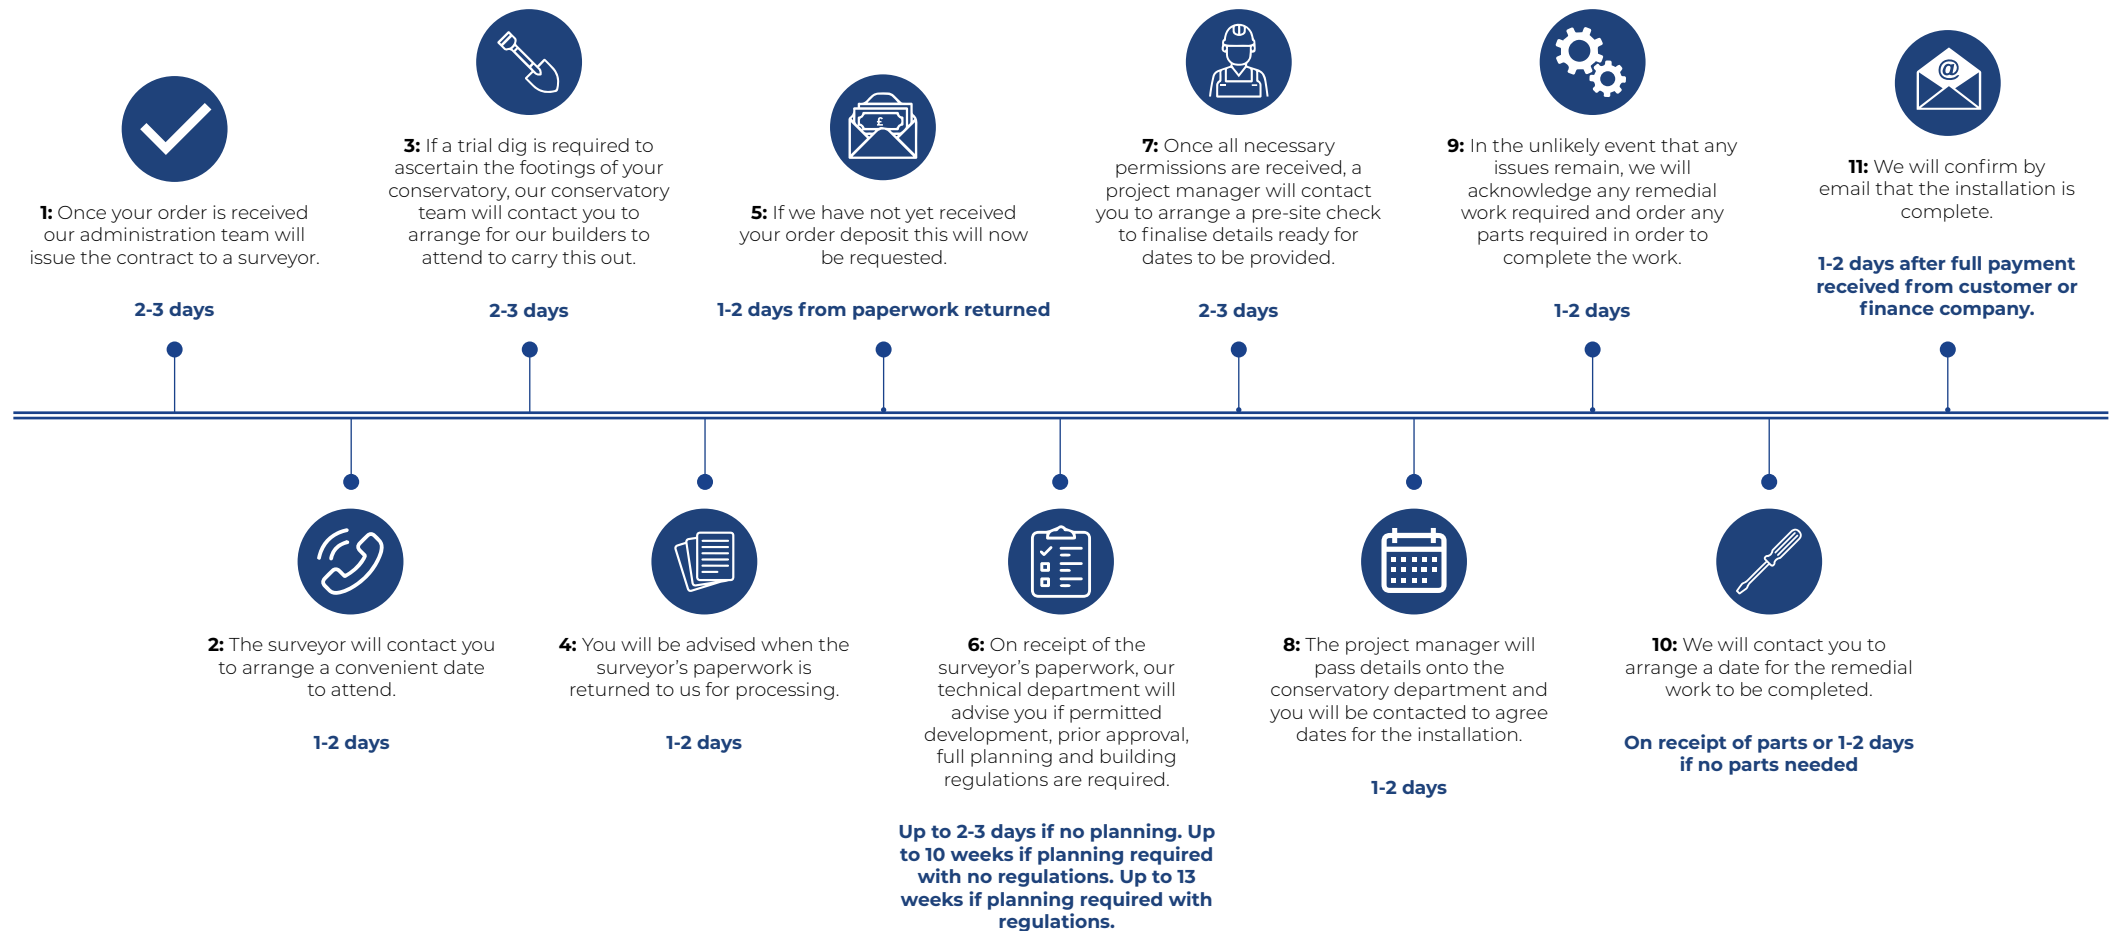

CONSERVATORY BASEWORK TYPICAL SECTION

Please note extra depth foundations or engineered piled foundations may be required on some installations to overcome local adverse ground conditions

TYPICAL SCHEDULE OF WORKS

We will provide you with a dedicated Project Manager and a definitive timeline of when all of the trades will be attending the site, along with the names of the specific individuals concerned.

Time frames are only a guide and sometimes lead times may vary

UPVC, TIMBER OR ALUMINIUM WALL FRAMES - WHATEVER IS RIGHT FOR YOU

When you set out to add a conservatory, orangery or glazed extension to your home, you want a product that perfectly matches the look and feel of your property – and the first big decision you have to make is what material you want to use.

At SEH BAC, we offer a choice of three fantastic high-performance materials, all of which are capable of providing you with stylish looks, exceptional energy efficiency and a lifetime of outstanding performance.

UPVC

Not just relatively cost-effective, but offering quicker manufacturing times and virtually no maintenance, uPVC provides a practical and durable window solution that can work well on a huge range of properties.

ALUMINIUM

With its unmistakably sleek, stylish aesthetics, aluminium's popularity has soared in recent years – thanks in part to TV shows like Grand Designs, where it's frequently used in striking and ambitious contemporary self-build projects.

TIMBER

It's no surprise that timber is one of the most enduringly popular window materials. Effortlessly elegant, with a timeless, traditional aesthetic that no competitor can match, it's just as suited to bringing a touch of vintage class to newer properties as it is to maintaining the historic character of period ones.

YOUR OPTIONS

UPGRADE AN EXISTING ROOF

We can transform your existing conservatory by replacing ageing, poorly performing roofs with state-of-the-art modern alternatives. You can have either the latest glass technology available, or a solid roof alternative which can be part glazed or completely solid.

REFURBISH ROOF AND WALL FRAMES

Got an existing conservatory that's past its prime? Then let us refurbish it with new energy efficient roof and wall frames. It'll be quick, efficient, and will leave with you with a versatile modern living space you can use and enjoy all year round.

DESIGN A BESPOKE NEW BUILD PROJECT

Extend your living space and add value to your home with a luxurious SEH BAC conservatory or glazed extension, specifically tailored to your requirements. Our expert designers and diligent installation teams will create you a light, spacious conservatory that will feel like an extra room in the house.

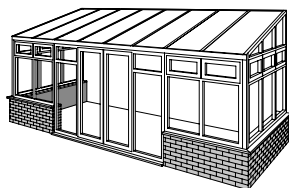

**We only use the
highest specification
glass in our
conservatory roofs**

for details**

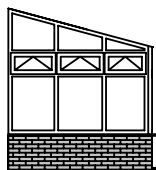

WHAT SHAPE CONSERVATORY TO CHOOSE

LEAN TO CONSERVATORIES

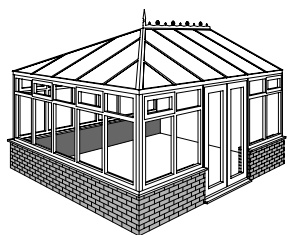

Simple to install and competitively priced, these uncomplicated rectangular conservatories feature a roof that leans on to the main property.

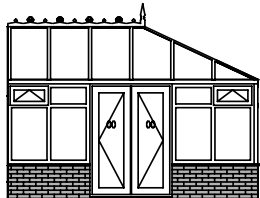

Their clean, modern lines make them the perfect fit for a huge range of properties, and offer an accessible, cost-effective way of bringing more space and natural light into your life.

EDWARDIAN CONSERVATORIES

With its high-pitched apex roof and clean, geometric lines, the Edwardian conservatory is more traditional than some designs, yet still perfectly compatible with any style and character of property. The large, square or rectangular room shape maximises floor space, whilst the sloping glass roof gives a greater impression of spaciousness, and creates a light, relaxed living space which the whole family can enjoy.

VICTORIAN CONSERVATORIES

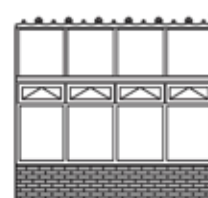

This classic, quintessentially English design has its roots in the Victorians' love of entertaining. Its elegant pitched roof, capable of incorporating three or five facets, gives it a distinctive curved appearance that maximises inside space and natural light. Its vintage appearance makes it an excellent match for more traditional properties.

GABLE CONSERVATORIES

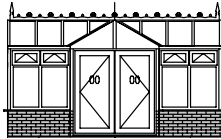

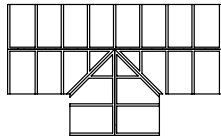

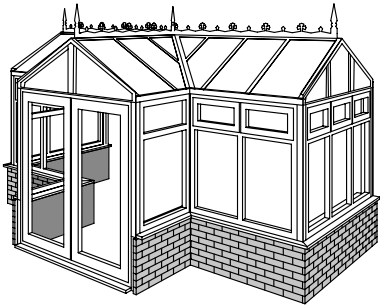

These tasteful Georgian conservatories feature a rectangular floor plan with a triangular front, and front windows that create a light, spacious feel inside. They perfectly complement the look and feel of older properties, with a style reminiscent of classical conservatories of the eighteenth century, but are equally capable of adding some grandeur and class to more contemporary homes.

COMBINATIONS

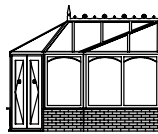

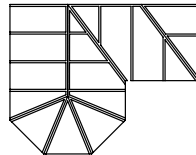

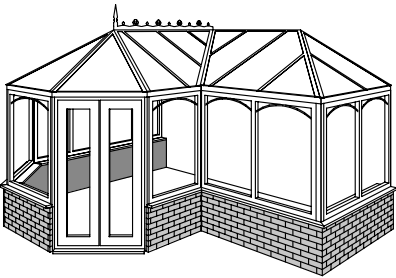

Of course, you're not just limited to one design. Combination conservatories allow you to create a variety of stylish, versatile spaces that draw on the strengths of multiple designs.

T-SHAPE CONSERVATORIES

A distinctive central projection allows T-shape conservatories to be divided into two different areas, or to create one larger area.

More space means more potential – T-shape conservatories can be used for a vast array of different purposes. However, their size and shape make them more suited for bigger properties, as the finished conservatory takes up more space than an average design.

P-SHAPE CONSERVATORIES

Ideal for larger, detached properties, the versatile P-shape conservatory combines the long, rectangular lean-to with the three or five-faceted Victorian style. Like the T-shape, this makes the P-shape ideal for use as two separate living areas. Many homeowners use the longer, lean-to section as a dining area, for example, and the rounded Victorian section as a lounge.

Did you know?
We also offer 'knock-throughs' – where we knock down an internal wall to link your conservatory to other parts of the home.

EXTENSIONS

Single storey extensions have transformed the way we live in and use the space in our homes, with many homeowners choosing to improve their property instead of moving house.

Whether you're looking for more space or to add value to your property, a single storey extension could be the ideal solution.

Many single-storey extensions can be built without planning permission – and, with our cutting-edge 3D design service, we can craft you a living space perfectly tailored to your needs.

“Every aspect was dealt with efficiently, a very professional and high quality service was provided and the fitters were very polite and personable.”

Mr Aylward

MODERN FLAT ROOFS

FLAT ROOF EXTENSIONS

If there's one thing we've learned from homeowners around the country, it's that the transition between home and garden needs to be perfect.

That's why at SEH BAC we've introduced our new modern flat roof extension with flat skylights – the latest extension roofing and technology and the perfect choice to bring style and simplicity to your extension design in a more cost-effective way.

The extension boasts level flooring thanks to our infinity seals, which we sink into the ground to allow a seamless transition into your garden or outside space which can be enjoyed all year round.

Offering unrivalled thermal performance and a pre-manufactured 'fall' system to ensure water drains away efficiently, their versatility allows opportunity for larger openings due to the structural elements which strengthen the doors.

The strength of our eaves beams provides ultimate design flexibility and is pre-manufactured for up to a 50 per cent faster build, so bi-fold and sliding doors can be included without the expense and cumbersome support.

Fully compliant with the latest Building Regulations, robust enough to withstand the harshest weather, efficient, and aesthetically striking, our modern flat roof extensions are at the cutting-edge of chic architectural design.

Available in several square or rectangular sizes to suit your individual project, our flat Skylight is designed to deliver maximum, uninterrupted sightlines whilst flooding the space with warming natural light.

Our modern flat roof extensions also make the ideal accompaniment to traditionally styled properties seeking classic elegance with a statement-making pitched lantern roof option.

If you are dreaming of a contemporary extension with a seamless open-plan living space that simply flows, then our modern flat roof extension will provide you with all the benefits of a conservatory, creating an interface between the garden and the home,

whilst providing a solid roof and seal which regulates temperature to keep your energy bills consistent.

SPECIFICATIONS:

- Level flooring to seamlessly flow to the outside
- Modern overhang to shelter doors
- Strong enough to span up to 5.8m above bi-fold or sliding doors
- Unrivalled thermal performance
- Extended soffit system to conceal light fittings and speakers
- Contemporary flat skylights or pitched lanterns for style and character

TILED ROOFS

Want a conservatory that looks more like a full extension of your existing property?

TILED-EFFECT

Our tiled effect conservatory roofs can be weathertight in a day, and incorporate insulated panels for fantastic thermal performance, low energy bills, and a versatile living space you can use all year round. Their lightweight design makes them the perfect choice if you want to replace your traditional glazed conservatory roof with a tiled alternative!

SOLID ROOF

Solid roof conservatories from SEH BAC excel on all fronts – offering beautiful glazing to maximise natural daylight, and a high-performance solid roof system that delivers style and substance.

This unique system allows you to combine sections of solid roof with sections of roof glazing – and decide what you want the ratio of solid to transparent roof sections to be! From the outside, it looks stylish and contemporary – while inside, you can enjoy a stunning vaulted ceiling and an abundance of natural light. What's more, it's five times more energy efficient than a traditional fully glazed conservatory.

“From walking into the show room, to the products being fitted. A complete first class service. From Dave the sales representative to Glen installing the products. Very professional organisation.”

Mr Haynes

ROOF LANTERNS

Want to bring a greater sense of space and light into your home? Then roof lanterns are the ideal solution.

At SEH BAC, our sleek, stylish roof lanterns can flood key areas of your property with natural light. Our most popular roof lantern is the UltraSky which uses slim frames to maximise natural light intake and offer uninterrupted views of the outside world. Energy efficient self-cleaning glass ensures low maintenance, and windows that minimise heat loss in colder weather.

Fitting a solid roof conservatory with roof lanterns lets you enjoy the benefits of both a traditional glazed conservatory and a brick-built extension.

If you want something more minimalist, then our flat skylight is the perfect option. Available in several square or rectangular sizes, it's designed to deliver maximum, uninterrupted sightlines and creates a fabulously frameless appearance inside and a modern, streamlined exterior.

GLASS ROOF

At SEH BAC, we know your conservatory is the investment of a lifetime. That's why we only use the highest quality components, ensuring you end up with a space you can enjoy all year round for decades to come – and glass is no exception.

We use cutting-edge self-cleaning glass. Stylish, strong and completely maintenance free, our glass comes available in a choice of four colours – blue, neutral, aqua and bronze.

U-Values of just 1.2 help reduce heat loss and cut energy bills in the winter months, while 60% of the sun's heat gets reflected away from the conservatory, reducing heat build-up in the summer.

SMARTGLASS

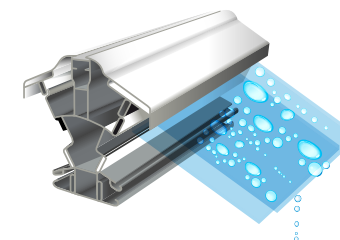

Smartglass has been continually developed, enhanced, and upgraded over the last decade to make sure you are kept warm in the winter and cool in the summer in your conservatory.

With a U-value of $1.2\text{W}/(\text{m}^2\text{K})$, a G-value of 40% and light transmissions of 52%, Smartglass also includes a 'self-clean' coating, eliminating any maintenance needs and uses warm edge technology to enhance its thermal capabilities.

Smartglass Ultimate delivers a U-value of $1.0\text{W}/(\text{m}^2\text{K})$, a G-value of 20% and light transmissions of 27%, this glass delivers even better energy efficiency performances and is available in the popular cool blue tint.

Smartglass Ultra 86 has a U-value of $1.0\text{W}/(\text{m}^2\text{K})$, a G-value of 14% and light transmissions of 15%, and is currently the best performing glass available on the market, offering unparalleled heat retention performances to reduce your home's energy bills and improve your home's carbon footprint.

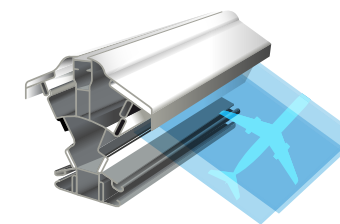

BENEFITS OF OUR GLASS

SELF CLEANING:

Once, cleaning conservatory glass roofs was a chore. Now, thanks to self-clean technology, this has been made easier than ever

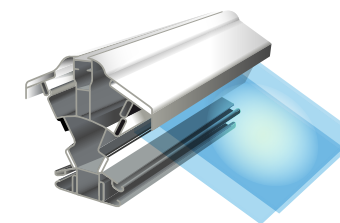

before. But while many conservatory roofs simply use easy-clean coatings that wear away over time, our glass roofs have self-cleaning technology built in. Cleaning the glass in your roof will be a breeze for years to come.

NOISE REDUCTION:

Rainfall on a polycarbonate roof is a sound generations of conservatory owners know only too well. But conservatory roofs don't

have to be noisy. In fact, swap your old polycarbonate roof for a modern glass replacement from SEH BAC, and you could enjoy noise reduction of up to 100% - perfect if you live on a busy road.

GLARE REDUCTION:

SEH BAC conservatory roofs come in four tasteful colours – but they're not just for show. Our tinted glass helps to reduce solar glare, protecting furnishings, fabrics and other household

items from sun damage.

Loggia columns are super-insulated, making them twice as efficient as cavity wall insulation, and ten times more efficient than traditional window glazing

ORANGERIES

Elegant orangeries were first used in the houses and palaces of nobility in the seventeenth and eighteenth centuries, allowing the well-to-do to grow and enjoy citrus fruits like oranges and lemons all year round.

Today, they're stylish, versatile spaces that combine all the advantages of a modern conservatory, with those of a brick-built extension. Inside, their internal soffits can be fitted with down-lighting for evening use, and, with the right connecting doors, an orangery can feel more like another room in your house than a traditional conservatory.

Or, for even more exceptional performance, you can opt for a loggia orangery. The loggia's super-insulated columns result in outstanding thermal performance, keeping energy bills low, and ensuring that the resulting space is as warm and comfortable as any other room in your house.

DOOR OPTIONS

Of course, it takes more than just walls and a roof to make a spectacular conservatory. The door products you choose to incorporate in your design make a big difference to the finished construction's look and feel, and give even more opportunity to tailor the project to your tastes and the character of your property.

At SEH BAC, we offer a huge door range that includes bifolds, sliding patio doors, French doors and more.

FRENCH DOORS

Stylish and sophisticated, French doors have been a firm favourite in UK households for decades. They give homeowners the choice of opening one door, to give easier access to the property and let fresh air in, or opening two, to blur the line between home and garden.

BIFOLD DOORS

Bifolds are a set of two or more glass doors that open in concertina style, then neatly fold flat when open. Where traditional patio doors can only ever be half open, bifolds can open fully to seamlessly connect indoor living spaces with patios and gardens.

SLIDING PATIO DOORS

Floor to ceiling patio doors are a fantastic way of giving you easy access in and out of your conservatory without obstructing views. Their toughened glass and strong frames mean you can enjoy the outside world without compromising your safety.

SEAMLESS FLOOR SILLS

To create a stunning floor and transition from inside to outside, all our doors are available with an infinity level floor option, meaning the tracks hardly visible. Stunning patio areas can be created to complete the landscaping around any new extension, while it provides perfect access for wheel chairs and anyone who has difficulty with steps.

Integral Blinds

INTEGRAL BLINDS

For the perfect addition to your bifold doors, windows or conservatories, integral blinds are a must. Safely enclosed in between the double glazed panes of glass, at SEH BAC our integral blinds control your room temperature without the need for expensive glass or the time-consuming frustration that accompanies the cleaning of traditional blinds. Available in venetian (horizontal slats) or pleated (textured pleated fabric) styles, you can also choose from our extensive range of colours to match and compliment your existing interior stylings with ease. Effective light and shade control doesn't get any better.

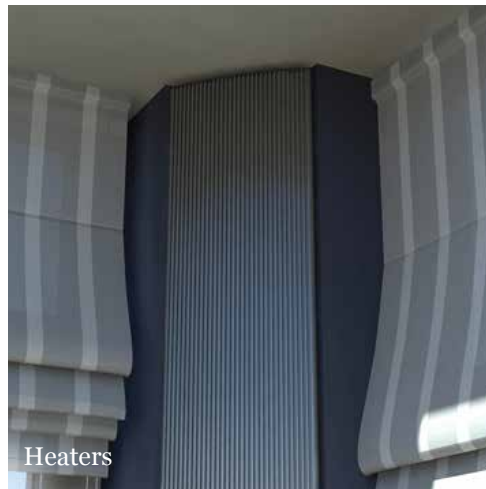

FINISHING TOUCHES

Constructing your conservatory, orangery or glazed extension is just the beginning. Once built, your stunning new living space is a blank canvas – and at SEH BAC, we can help you with the finishing touches that will make it your own.

Our experienced design team can help you choose everything from heaters to décor and blinds – so don't hesitate to ask for advice at any time!

DON'T JUST TAKE OUR WORD FOR IT...

Our new Living Roof exceeded all expectations

"We had triple glazed windows, conservatory and front door fitted by SEH BAC and from placing the order through to the finish the service was first class. We were kept informed at every stage of the order as to what would happen next, and the finished product is superb."

Ms Patterson

First class workmanship by the SEHBAC team

"First class workmanship by the SEHBAC installation team of Paul and Lee who completed a faultless installation of a new conservatory in three days, including removal of an existing structure."

"We are extremely pleased with the whole operation from the point of ordering to final completion and would not hesitate to recommend SEHBAC!"

Ms Taylor

Recently had a New tiled roof...

"Recently had a New tiled roof conversion fitted, from order to installation was a mere 10 weeks. The team were so informative and helpful with every query I had. I was never aware of all the different Finance options available and I was amazed by how safe I felt investing into my home with this company. I'm sure to recommend sehbac to all neighbours and friends."

Mrs Bulk

We have used SEH BAC twice...

"We have used SEH BAC twice for a conservatory and replacement windows. We found their team very courteous and professional at all levels and the service was smooth from first contact to installation."
